Challenge

Properly planning and scheduling work is essential to effective maintenance practice. Work planning can be done directly in SAP, but it requires time and effort to track and manage the number of work orders processed.

Solution

Vesta PMM enables customers to manage the work planning process in Microsoft Project. Work order dates and assignments can easily be moved from SAP to Microsoft Project and then back. Vesta PMM is a Microsoft Project Add-In for Project 2007 and 2010 and supports SAP ERP version 4.7 and higher.

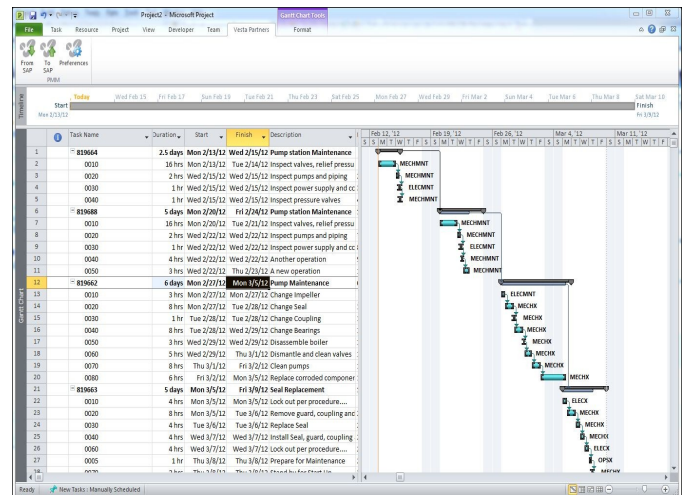

Benefits

- Reduce time to assign and optimize PM work.
- Leverage MS Project knowledge in work planning.
- Display charts of PM work in MS Project.

VESTA SOFTWARE PRODUCTS

At Vesta, our strength is the combination of functional SAP EAM expertise along with a deep knowledge of key SAP technologies. We have built our software applications to meet specific business requirements, resulting in a significant return on your investment.
